Strategic Goals

- Group One
 - Supplements your knowledge by taking UX and UI course from google
 - Update my resume and get my projects in order and in a portfolio
 - Network by going out for tech events and meetups
 - Update my Linked in
- Group Two
 - Send out my resume to potential employers
 - Keep learning and practicing
- Group Three
 - Find three people to mentor
 - Work on Internet Mama.

Practice Challenge #2

Three things you learned in the Leading Self module.

1. Whatever type of boss you have in the end your career will flourish due to self-leadership
2. Someone should focus on the impact and creating engagement when setting strategic goals
3. When leading people. Encourage them to take up self-leadership and remind them that you will still be available if they need you.

Two things you liked about or 2 interesting facts you learned from the Leading Self module

1. The golden rule of self-leadership is to give feedback you'd like to receive
2. You should always reward yourself for an accomplishment to sustain long term and short term motivation

One way you could apply what you've learned from the Leading Self module.

1. In my freelance job when communicating with my superior I will start being actively involved in my self leadership
